- PROJECT EXPERIENCE
- Content-Based Image Retrieval (CBIR) – Academic Team Project

Python, Machine Learning, Tkinter

 - Developed a machine learning-based system for retrieving images based on visual content.
 - Implemented feature extraction and similarity matching techniques.
 - Designed and developed a graphical user interface using Tkinter.
 - Collaborated in a team environment following software engineering best practices.

ContourDetect – Desktop Application (Academic Team Project)

Python, Tkinter

 - Developed a desktop application for contour detection and image processing.
 - Implemented image processing algorithms using Python.
 - Built an interactive and user-friendly interface with Tkinter.
 - Worked collaboratively within a team to design, develop, and test the application.

INTERNSHIP

Introductory Internship – Regional Health Directorate (DRSPO)

August 1 – September 1

Designed and developed a full-stack web solution (using ASP .NET and React) for the management and digitization of official correspondence, enabling improved access, tracking, and organization of administrative documents across multiple departments.

- MENTORING EXPERIENCE
- Mentor – Software Engineering Club (Projects Cell)

 - Mentored students in problem solving, data structures, and algorithms.
 - Delivered training sessions on LeetCode-style coding challenges using Python.
 - Guided students through logical thinking, optimization, and clean code practices.
 - Strengthened communication, teamwork, and technical explanation skills.

EDUCATION

2024 – Present	Engineering Degree in Computer Engineering (In Progress)
2022 – 2024	Preparatory Classes for Engineering
2021 – 2022	Bachelor’s Degree in Physics and Chemistry

CERTIFICATES

Programming Languages: Python, Java, SQL	System Optimization 2028 Problem Solving, Data Structures and Algorithms, Object-Oriented Programming	Tools & Concepts: Git, Docker, Jira, Scrum, Kanban
